

The 2014 South Sound Science Symposium
“Taking the Pulse of South Sound”
October 23, 2014
Squaxin Island Tribe’s Event Center

CALL FOR ABSTRACTS

- **Poster Session and Gala**
- ***South Puget Sound Abstracts***

The 2014 South Sound Science Symposium spans a variety of important environmental issues of interest to a broad audience. The purpose of this year’s Symposium is to review recent research in physical processes, water quality, and biotic communities in the South Puget Sound region. This includes not just salt water, but also freshwater, land, and air. We have an excellent slate of invited speakers covering a wide variety of topics. Unfortunately, a one-day symposium cannot hope to cover the full scope of scientific work underway in South Puget Sound.

The Symposium also gives researchers an opportunity to share their work by means of a poster gala and an electronic collection of abstracts. To this end, we invite all scientists and technical staff from educational institutions, government and tribal natural resource agencies, non-profit groups, and the private sector to submit poster abstracts to the Symposium. Individuals from several agencies working on a joint project are encouraged to collaborate on an abstract. While abstracts should discuss research conducted in the South Sound region, research conducted elsewhere that can be directly related to the South Sound is also acceptable.

Poster Session and Gala

Abstract author(s) are encouraged to prepare a poster for the reception and poster gala.

Those who wish to prepare a poster must:

1. **Complete the [Abstract Submission Form](#)**
2. **Register for the Symposium**

Please note that we have room at the event for a limited number of posters and want to make sure that we cover the range of scientific research that is currently occurring in the South Sound region. Selection of abstracts for posters will be based on relevance to the major themes, quality of the abstract, and distinctiveness of the research. Authors are requested to be available to discuss their posters at the reception and poster gala, which begins at 4:00 pm the day of the Symposium.

Topic Synthesis Poster

We have room for a small number of topic synthesis posters that clearly and succinctly summarize the literature of a broad subject for a general audience. Posters that synthesize, for example, the geology, shellfish biology, or animal migrations (among other topics) in the

South Puget Sound would be considered. Please contact Tom Kantz (tkantz@co.pierce.wa.us) if you are interested in submitting a topic synthesis poster.

South Puget Sound Abstracts

All accepted abstracts will be combined into an electronic document that will be accessible on the web by the time of the Symposium. The compilation will be a valuable resource for those interested in scientific work currently underway or recently completed in South Puget Sound.

IMPORTANT DATES

- Submit abstracts by close of business **Friday, September 5, 2014** to Tom Kantz (email: tkantz@co.pierce.wa.us, phone: 253-798-4625). Use the [Abstract Submission Form](#).
- Authors selected for posters will be invited by close of business **Friday, September 19, 2014**.
- Poster set up is the morning of the Symposium, no later than 10:30 a.m., **Thursday, October 23, 2014**, and the reception and poster gala begins at 4:00 p.m.
